TRITIUM NIGHT SIGHTS | IRON SIGHTS | FIBER ROD | PAINTED DOT

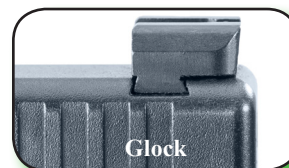

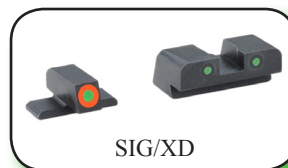

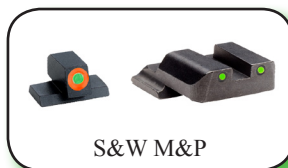

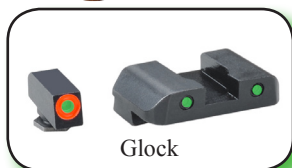

With over 15 years of design and manufacturing expertise, we excel with a passion and commitment to innovation, quality and customer service. All of our firearm sights are proudly designed, machined, and assembled with tritium illumination.

Spartan Operator Sight Sets

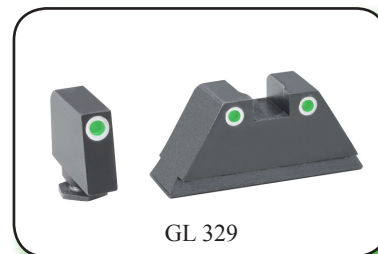

Built upon the classic 3-dot design, the Spartan Operator sights feature a glare reducing rear tritium sight design and the popular ProGlo orange outline tritium front sight, delivering a faster front sight acquisition.

CAP Sight Sets

Green tritium front sight with LumiGreen outline. Rear sight is our flat-black Classic rear with a LumiGreen horizontal line. The LumiGreen outline absorbs light energy and glows in the dark after a brief 20 second charge.

Combative Application Pistol (CAP) Sight; a high visibility sight system designed for personal security situations. Designed by retired law enforcement officer, author and combat pistol instructor Dave Spaulding, and Rick Callihan, the CAP sight enables shooters to reference their front sight even in times of high stress like armed conflict. Fast and highly visible, the CAP sight is a "Cover Point of Impact" sight in that the shooter covers what they want to hit.

Ghost Ring Night Sight Sets for GLOCK

The Ghost Ring Sights utilize an aperture style rear sight with two tritium mini-dots and a bright tritium front sight providing quick front sight acquisition by leading the eye to automatically center itself in the rear ring while focusing on the front sight. Preferred sights for shooters seeking an alternative to traditional post and notch sight design.

AmeriGlo Chemical Light Sticks

Safe and Dependable Light Sources

Chemical light sticks are industrial grade, providing a safe and reliable light source for use in all environments. Ideal for emergency kits at home, the workplace, and when traveling. Each light stick is individually wrapped, providing long term storage (4+ year shelf life). Our light stick is safe for use in confined spaces, indoors and outdoors, and is safer to use during power outages and emergencies than candles and heat/spark generating light sources. A 6-inch light stick provides adequate lighting for a standard-sized hotel room.
