when reliability really counts

Trilobyte Helmet Light Gen5™

Programmable Beacon

850/940nm, 1064nm & 1550nm Outputs

TM

2.5oz (72g) w/ Battery

PRODUCT NUMBER: 02905-CQB

VISIBILITY RANGE

One (1) AA Lithium (1.65Vdc) or AA Alkaline (1.5Vdc)
3M Dual Lock (Installed on Base of Unit)
Black Only
High Impact Lens with Shock Absorbing Polymer Base Matte
High Impact Polycarbonate (Textured)
-40 to +60°C with AA Lithium; -20 to +60°C with Alkaline or Rechargeable AA
-40 to +60°C with AA Lithium; -20 to +60°C with Alkaline or Rechargeable AA
Hermetically Sealed Unit with Removable Battery Cap
IP 68 - 100m / 330ft
Up to 5km on High Intensity on a clear dark night (with no moon or contrasting backlighting)

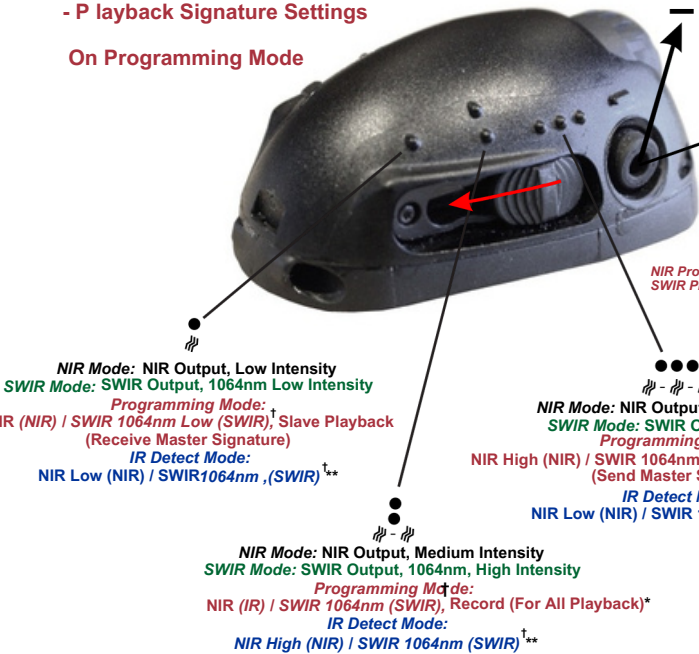

FEATURES

- A wide range of functions organized in a user friendly, intuitive system; designed for one-hand operation with index finger and thumb.
- Synchronized group flashing with AutoSync Technology
- Dual Button Polarity Program Switching® Separates NIR, SWIR and Programming modes.
- User programmable flashing signatures with no extra tools needed using Mockingbird® Technology
- Can send and receive programmed flashing signatures to other Trilobytes of the same model, enabling individual groups of unique flashing signatures.
- Sophisticated IR Detect Mode accessible from the Trilobyte's Programming Mode function set.
- Raised position nubs for positive tactile feedback and sequential vibrating pulses to indicate position with MultiVibe Technology

Left-Side Positions

- Intensity controls on IR Mode
- SWIR wavelength (nm) selection on SWIR Mode
- P layback Signature Settings

On Programming Mode

Functions Diagram

Pressing and holding the two side buttons for specific lengths of time will activate the Trilobyte's various P programs:

Hold and count to 1 for NIR Mode

Hold and count to 3 for SWIR Mode

Hold and count to 6 for Programming Mode

NIR Programming Mode will activate if unit was in NIR Mode prior

SWIR Programming Mode will activate if unit was in SWIR Mode prior

(Going to OFF Position will reset to Default Covert Near-IR Mode).

Right-Side Settings

- Main functions and OFF switch

Playback Recorded Signature (Default Steady-On)
Programming Mode: On / Program

*Record Function will overwrite all Playback functions in all modes

** IR Detect Function: Product will vibrate 5 times and flash in position-specific wavelength for 5 seconds when exposed to a Near-IR Wavelength

†

Output wavelength for functions in Programming Mode (and sub-set IR Detect Mode) are dependent on whether the Trilobyte is set to Near-IR (NIR) or SWIR versions of Programming Mode. This is dependent on whether or not the Trilobyte was in IR or SWIR Mode prior to Programming Mode activation.

Functions Table

CHANGING MODES

Hold and count to 1 then release for **Near-IR Mode**
 Hold and count to 3 then release for **SWIR Mode**
 Hold and count to 6 then release for **Programming Mode**
IR Programming Mode will activate if unit was in NIR Mode prior
SWIR Programming Mode will activate if unit was in SWIR Mode prior
 (Going to OFF Setting will reset to Default Covert Near-IR Mode).

Dual Button Polarity Program Switching®

Pressing and holding the two side buttons for specific lengths of time will activate the Trilobyte's various Modes.

Each Mode contains its own set of functions that are toggled through the dual left-side and right-side control switches.

Near-IR Mode Functions

(Hold down side buttons (+) and (-), count to 1 then release. Default Mode on activation)

Right-Side Settings o | -

SWIR Mode Functions

(Hold down side buttons (+) and (-), count to 3 then release)

Right-Side Settings o | -

SWIR Programming Mode Functions

(From SWIR Mode, hold down side buttons (+) and (-), count to 6 then release)

Note: Record Function will overwrite all Playback functions in all modes

NIR Programming Mode Functions

(From NIR Mode, Hold down side buttons (+) and (-), count to 6 then release)

Note: Record Function will overwrite all Playback functions in all modes

IR Detect Mode (SWIR Output)

Initiated by moving Right-Side Control Switch to (-) setting on SWIR Programming Mode

IR Detect Mode (NIR Output)

Initiated by moving Right-Side Control Switch to (-) setting on NIR Programming Mode

Accessories (Sold Separately)

Turtle Mount

Part Number: M0492-15-BK (Black)
M0492-15 for Tan

MOLLE Pouch

Part Number: 99002-2 (Black)
99002 for Tan; 99002-1 for Green

Feature rich with ports to connect to our **Universal Mount™**, MOLLE compatibility for attaching to vests, backpacks, etc... cavities for securing with nails or screws and a quick release nub.

Our modular pouches with rear lash points, exterior and interior loop surfaces, inside pocket and a quick release strap can securely hold the Trilobyte™ and a spare battery, with leftover space if needed.
